

# Hailemariam Kebede

Software Engineer

## About Me

As a junior software developer, I specialize in full-stack development for both mobile applications and web development. My skills include Flutter for mobile app development, Firebase for backend services, and proficiency in the MERN stack, which comprises MongoDB, Express, React, and Node.js.

## Skills

- **Programing language:** javascript, C++, Dart
- **Frameworks:** Flutter, Node, React,
- **Database Systems:** MySQL, SQLite ,Firebase, mongoDB
- **Systems:** MySQL, SQLite ,firebase
- **Tools:** Android Studio, Visual Studio Code,
- **Development Methodologies:** Scrum, Agile
- **Graphics design:** Figma UI/UX, Photoshop skill

## Languages

- Amharic ★★★★★
- English ★★★★★

## Projects

### MOBILE APP DEVELOPMENT

1. AppointMe mobile Application
  - Using flutter and
  - Firebase
2. LabInfo mobile Application
  - Using flutter and
  - Firebase

### CURRENTLY WORKING ON

1. Performance Tracker and gym payment mobile Application
  - Using Flutter, React and
  - Firebase
2. Health Information Management System
  - Using MERN stack in microservices architecture and
  - Kafka message broker
3. Web-Based Exam System
  - Using flutter for mobile app features and
  - MERN Stack for exam system features

## Educations

- 5th year software engineering student at Wollo University.
- Currently learning cloud computing Microsoft Azure 6 month training at wollo university appfactory academy.
